M E R N

PERSONAL BIO

A resourceful **full-stack web developer** | **web designer** equipped with **MERN stack** and forte in art and film, I'm on a quest for a full stack web developer position, not to mention, stand-alone **front-end** or **backend-developer positions**. I put myself out on vigorous effort to learn my client's business objectives for their projects and make sure my development maneuver does justice to their insight. I pride myself in nourishing my motivation with your requirements to advance in the forefront of **cutting-edge web technologies**. Currently, I'm in the pursuit to obtain an opportunity in being a part of formulating your abstract ideas and **corporate goal**s into concrete experience.

SKILLS

o   Build a frontend website either from scratch or by utilizing a front-end framework (such as Bootstrap)
o   Deploy static and dynamic websites to the cloud
o   Implement complex logical conditions to meet an objective
o   Write SQL commands to perform Create, Read, Update and Delete commands
o   Create a full stack Single Page Application with AJAX communication
o   Develop your vision for a website – and then build it
o   Expertly navigate the file system and terminal basics
o   work independently or in a group on complex projects throughout the entire Software Development Life Cycle
o   understand the basics of troubleshooting and enhancing legacy code
o   communicate the basics of serving a webpage and how the browser renders code
o   Creates RESTful APIs utilizing JSON as a data format
o   Consume RESTful APIs properly utilizing REST verbs
o   Create robust web applications and services using MVC architecture
o   Create session-based applications utilizing user authentication schemes that are well known and widely used

BROWSER BASED TECHNOLOGIES
